Construction

Construction is a dynamic industry subject to frequent changes and demands. Tax requirements, interest rates, volatile raw material and energy prices, as well as material and labor shortages often dictate whether a construction company will prosper or suffer. High insurance costs, increasing government regulations and a weakened economy all add to the complexity of the issues faced by business owners. It is essential to the future of your business that your professional advisor understands the challenges, opportunities and marketplace.

At EisnerLubin, we focus on the specific needs of construction firms from startups to long-established companies by providing a range of accounting, auditing, tax and consulting services specifically designed to meet the unique needs of this industry.

With a focus on operational efficiency and managing cash flow, the services we offer include:

- [Audit, review and compilation of financial statements](#)
- [Tax planning and compliance](#)
- Profit enhancement programs
- Strategic business planning
- Succession planning
- Internal controls and reporting
- Corporate structure
- Transferring ownership
- Buy/sell agreements
- Valuation services
- Compensation strategies
- Financing techniques
- Employee benefits plan audits and preparation of Form 5500
- [Information technology](#)
